SUMMARY

Passionate full-stack developer with a Software Development Certification from San Diego State University. Committed to delivering exceptional results and creating amazing products that are both functional and aesthetically appealing.

EXPERIENCE

Annotation Analyst

Apple

March 2021 – Present, San Diego

- Listen attentively to audio samples and transcribe customer interactions with Siri, assessing responses and language usage within the grading program.
- Utilize language expertise, cultural knowledge, and analytical skills to evaluate responses against established guidelines, ensuring accuracy and adherence to quality standards.
- Train new team members, guide onboarding, and assist in achieving certification for a 100% success rate.
- Foster a collaborative and supportive team environment, promoting knowledge sharing and continuous learning initiatives to improve overall team performance.

French Canadian Member Advocate

Infinity Development Group

August 2019 – February 2021, San Diego

- Respond to member and dealer promotion calls professionally, offering accurate information in both French Canadian and English.
- Help close all promotion-related tasks post-event, including obtaining paperwork from dealers and members.

PROJECTS

Formify

Personal Project • <https://www.formifyapp.com> • August 2023 – November 2023

- Spearheaded the development of Formify's backend infrastructure using Node.js, Express, and MongoDB, optimizing data flow and ensuring robust API functionality.
- Implemented an efficient frontend using React and CSS, delivering a seamless user experience and responsive design for various devices.
- Executed deployment strategies for optimal performance, utilizing Heroku for the backend and AWS Amplify for the frontend, resulting in a reliable and scalable application architecture.

HungryHub

San Diego State University • <https://www.hungryhub.us> • July 2023 – August 2023

- Created a web app prototype for easy food ordering and doorstep delivery.
- Implemented DynamoDB backend for seamless data flow, enabling real-time updates and a smooth user experience on the frontend.
- Prioritized optimizing the app's user experience, making it fully functional and enjoyable on both desktop and mobile devices.
- Received the grade 24/25.

FitByMe

San Diego State University • <https://github.com/Jehman06/HungryHub.git> • April 2023 – May 2023

- Developed the back-end of the application using Node.js, Express and MongoDB, ensuring real-time updates and seamless functionality.
- Demonstrated the application as part of a team presentation, effectively showcasing its features and gathering valuable user feedback in real time.
- Received the grade 23/25.
